📄 PROFILE

I am an aspiring **.NET Backend Developer** with hands-on experience in Angular, PostgreSQL, and MySQL. My expertise spans **.NET technologies** including **ASP.NET MVC** and **ASP.NET Core**, along with proficiency in **Entity Framework**. I have a strong foundation in SOLID principles, layered architectures, and RESTful concepts, with a keen interest in exploring microservices. Additionally, I am proficient in TypeScript, C, and Java, which enhances my versatility in addressing diverse technical challenges. Committed to continuous learning and growth, I am eager to contribute to impactful projects and further advance my software development skills.

🌐 LANGUAGES

English — Proficient

Turkish — Native/Bilingual
C2

📄 CERTIFICATES

- Software Developer Bootcamp (C#+Angular)
- AspNet Core Web/API+N- Tier | Best Practices
- Oracle Certified Professional, Java SE 6 Programmer
- Oracle Certified Professional, Java SE 8 Programmer
- Python programming 2

📁 PROJECTS

=> **RentCar Back-End Side**, This project encompasses a car rental platform developed based on the principles of RESTful architecture
Tech Stack: C# .NET, OOP, Entity Framework, LINQ, AOP, Cross-cutting Concerns(logging, caching, authorization, transaction management), SOLID, JSON Web Token (JWT), Fluent Validation, N-Tier Architecture, Postman

=> **E-Commerce-API**, Currently developing a comprehensive e-commerce platform with a focus on scalability and performance.
Tech Stack: .NET Core, ASP.NET Core Web API, Angular, PostgreSQL, Redis, RabbitMQ, Onion Architecture, EF Core, Async/Await, JWT

=> **ECommerceClient (Angular)**, Developing an e-commerce client application using Angular with ongoing development
Tech Stack: Angular, Angular Material, jQuery, Toastr, RxJS, Angular Router

=> **NLayerApp**, This project is focused on establishing a layered architecture using both ASP.NET Core API and ASP.NET Core MVC. Through the integration of API and MVC, the goal is to demonstrate the combination and interaction of layered structures.
Tech Stack: Global Error Handling, AutoMapper, Entity Framework (EF), Action Methods, Migrations, UnitOfWork, Autofac, Generic Repository, N-Tier Architecture

=> **E-Commerce-Backend**, This project has been developed based on the concept of an e-commerce shopping website, implemented using N-tier architecture.
Tech Stack: LINQ, AOP, Cross-cutting Concerns, SOLID, JWT, Fluent Validation, N-Tier, Postman

=> **StoreApp-master**, The shopping application I'm developing is based on ASP.NET Core MVC training
Tech Stack: C#, ASP.NET Core MVC, Dotnet CLI, JavaScript, Bootstrap

🎓 EDUCATION

Language school, American Culture Language School
10/2023 – 05/2024 | İzmir, Turkey
B2(European Language Portfolio)

Management Information Systems, Bartın University
09/2019 – 07/2023 | Bartın, Turkey

📁 PROFESSIONAL EXPERIENCE

Backend Developer(.NET), Spor Yap
06/2024 | İstanbul
voluntary work(remote)

Office Incharge & Field Surveyor,
Dingin harita Mühendislik Hizmetleri
- Managed office operations, including project coordination and team management.
- Conducted field inspections of mining areas, ensuring compliance with project specifications.
- Facilitated effective communication with clients to address inquiries and resolve issues promptly.
- Coordinated logistics and scheduling to optimise project workflow and efficiency.
